**Subject:** front end loader  
**Date:** Wednesday, November 8, 2017 12:55:00 PM

---

Hi Matt,

Larry has ordered a bunch of boulders for some homeless issues. We can take delivery any time but we need a front-end loader to help us off-load. Mondays are good for my team, if any chance you have someone available for Monday, we could schedule the delivery.

Thanks!

Carla

Hi Carla,

Wanted to check in with you for the Field Stone delivery location and dates.

These are the stones that Larry requested.

We will need a backhoe on site and or here at the yard to off load the stones.

Please let me know when you get a chance so I coordinate with Lyngso etc...

Mike

Hi Ken,

Mike Kelly and I were able to meet on site this morning at Cesar Chavez and Kansas to walk through the scope of off-loading the boulders.

Some items that are still pending that will need coordination for Monday morning.

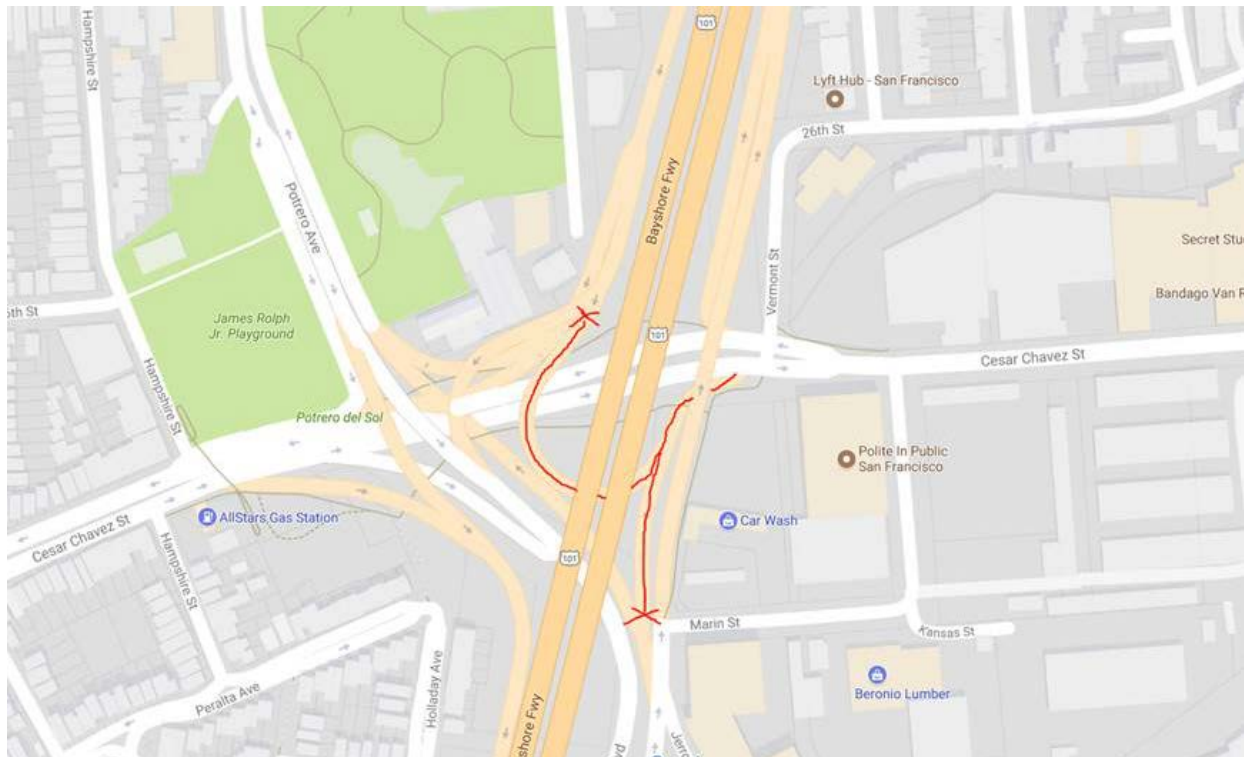

SES – need to have the homeless campers and debris moved from both locations to enable the boulders to be safely placed. (Ken can you assist in coordination of this?)

Cal Trans – traffic control of the east bound Cesar Chavez off ramp from northbound 101 freeway and the east bound Cesar Chavez intersection coming from north bound Bayshore. (Matt can you assist in coordination of this?)

BUF will provide the on street traffic control as needed.

Image of map below...

Thanks everyone.

Hi Mike G. Thanks for coordinating and taking the lead on this project. Larry Stringer contacted Caltrans and they will be at the site for traffic control in the morning at around 8:30 a.m. I've attached the location map you originally sent marking the locations where the boulders should be stockpiled. Ken and I thought 10 boulders on north side of Chavez Street and the remaining 2 on the south side. Thanks, Matt

**Subject:** RE: Boulder Delivery

Hi Ken,

Mike Kelly and I were able to meet on site this morning at Cesar Chavez and Kansas to walk through the scope of off-loading the boulders.

Some items that are still pending that will need coordination for Monday morning.

SES – need to have the homeless campers and debris moved from both locations to enable the boulders to be safely placed. (Ken can you assist in coordination of this?)

Cal Trans – traffic control of the east bound Cesar Chavez off ramp from northbound 101 freeway and the east bound Cesar Chavez intersection coming from north bound Bayshore. (Matt can you assist in coordination of this?)

BUF will provide the on street traffic control as needed.

Image of map below...

Thanks everyone.

Hi All,

Boulder placement went well today along Cesar Chavez...

Larry is asking that we spread out the boulders along the fence line a bit more between the fence line and Cesar Chavez. Currently we have the access points blocked to keep carts and gear out of the area and boulders placed in and around the areas that people crowd in tents.

Attached are a few images of today's placement. I am thinking we will need to coordinate getting a backhoe out there again this week to spread the boulders out some more.

Please let me know if any additional info is needed or coordination on my part.

Thanks everyone,

Mike

Hi Mike G. Thanks for coordinating and taking the lead on this project. Larry Stringer contacted Caltrans and they will be at the site for traffic control in the morning at around 8:30 a.m. I've attached the location map you originally sent marking the locations where the boulders should be stockpiled. Ken and I thought 10 boulders on north side of Chavez Street and the remaining 2 on the south side. Thanks, Matt

Hi Ken,

Mike Kelly and I were able to meet on site this morning at Cesar Chavez and Kansas to walk through the scope of off-loading the boulders.

Some items that are still pending that will need coordination for Monday morning.

SES – need to have the homeless campers and debris moved from both locations to enable the boulders to be safely placed. (Ken can you assist in coordination of this?)

Cal Trans – traffic control of the east bound Cesar Chavez off ramp from northbound 101 freeway and the east bound Cesar Chavez intersection coming from north bound Bayshore. (Matt can you assist in coordination of this?)

BUF will provide the on street traffic control as needed.

Image of map below...

Thanks everyone.

We were able to better place the boulders on Tuesday and have the area 90% completed.

We need about 10-12 more boulders placed to complete the area under the 101 freeway over pass. We do have in our east yard 12 large similar boulders that we can use to complete this area if they are not being used elsewhere.

Just an idea.

Thank you,

Have we put in the order for the boulders from Lyngso? Do we know how they will deliver these boulders? We will want them to be

delivered at the site (under the over-pass along Cesar Chavez).

Let me know

All I said was we need 3 days to arrange delivery. Matt was supposed to let us know when. If he wants Monday we can call Lyngso and see if they can do it, but we'd just need to confirm.

Matt is working with Mike Kelly to coordinate for Monday delivery to our yard is the last I heard. Larry wanted to make sure that Cal trans was scheduled first if we were to deliver directly to the site rather than our yard.

The PO is with Lyngso and they are ready when we are.

Maybe check in with Matt/Larry?

Hi Paul,

Here is the PO for the boulders...

We are looking to get these in on Monday if possible.

Corner of Cesar Chavez at Kansas on the north west side of our operations  
yard.

My number 415-505-5644 is best for the driver to coordinate off-loading site.

If Monday is too tight, what other days work for you?

Thanks again,

Mike

Hi Matt,

Just to answer a few questions...

Lyngso, our supplier, ideally needs 3 days lead time to coordinate deliveries.

Usually with larger trucks we ask that the drivers do not enter our lower yard till after 8am to enable easy maneuvering in and around the yard due to working with large 60ft trailers.

For now we are hoping to stock pile these boulders for a short time, a week or so, down in the lower east yard next to the existing boulder stock pile.

We are receiving 30 each 2X3X3 boulders.

I am happy to help coordinate or answer any further questions at all.

Thanks for the help with this item.

Mike
